DETAILED ACTION

Applicants preliminary amendment canceling claims 14-23, 34 and 35, Paper No. 2, 8/24/2001, is acknowledged. Claims 1-13, 24-33 and 36 are present for examination.

Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a method for screening chemically modified mutant enzymes for amidase and/or esterase activity, classified in class 435, subclass 19.
- II. Claims 24-33, drawn to a method of producing a chemically modified mutant enzyme, classified in class 435, subclass 130.
- III. Claim 36, drawn to a method of treating a textile, classified in class 435, subclass 263.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

The methods of Groups I-III are independent as they comprise different steps, utilize different products and produce different results.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and the literature

and sequence searches required for each of the Groups are not required for another of the Groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
